

T-BERD/MTS-2000/-4000v2 & ONA-800

Latest version

Version ID : 230350

Release date : January 20th, 2023

| Application | Version | Date |
|------------------|---------|------------|
| Boot | 10.81.2 | 2022/10/28 |
| Linux Kernel | 25.2.2 | 2022/11/04 |
| File System | 23.1.0 | 2023/01/20 |
| Instrument Setup | 23.04 | 2023/01/20 |
| Microscope | 23.04 | 2023/01/20 |
| Fiber Optics | 23.04 | 2023/01/20 |

Mainframe / Base Unit

Problem corrections

- Expired temporary FO license still visible on ONA-800 system screen is fixed
- Sync of FO configuration files in ONA-800 with Stratasync is fixed
- FTTA-SLM Application crash on ONA-800 is fixed

OTDR

Improvements

- Enhancement of grouped events pass/fail analysis
- Possibility to add a customized pulse width in the OTDR setup menu
- Default bend detection change to 0.3dB

Problem corrections

- ExpertOTDR: Event notes now available standard (no longer requires Super Expert SW license) for Point-to-Point and PON Network Configs
- "Show cursor" setting is now saved in the config file
- SLM/Table update problem when changing event type manually is fixed
- "." Symbol added to German keyboard

LTS (Power Meter/ Source Application)

Problem correction

- Problem with directory management is fixed

Cable-SLM

Improvements

- Enhanced management of labels
- Acquisition test sequence performed according to presence of optical switch or not
- New Cable-SLM project creation

Problem corrections

- FCOMP-PRO job associated to Cable-SLM now pushes configuration into both FCOMP-PRO and OTDR.

FTTH-SLM

Improvements

- 4100A module: With FTTH-SLM Base License, the selection and analysis of 2 splitters is now available

Problem corrections

- “Launch cable connected directly to splitter” bug is fixed
- “Event code on top of existing splitter icon is not set when reloading .csor file” bug is fixed

FiberComplete PRO

New functionalities

- High acquisition time with manual OTDR set up (3min)

Improvements

- Faster switching time for MPO switch
- Switch port selection now possible with Cable-SLM project/ label/ Simplex fiber
- Enhancement of the stop function in FCOMP-PRO while running a test sequence
- Enhancement of the automatic switching sequence for MPO switch module / 4100B FiberComplete Module / ONA-800 Platform

MPO SWITCH MODULE:

- Set up option “switch sequence” no longer accessible in the HMI when a project has been opened via Cable-SLM (option remains possible in manual switching mode only)
- Set up option “MPO 20/24 & MPO 24/24” no longer accessible in Cable-SLM project/ label list/ multifiber connectors/fiber count
- Set up option “Report/ consolidated option” no longer accessible with Cable-SLM project opened

FCOMP-PRO:

- Pdf report now includes OTDR traces after “replay TrueBidir” is performed
- Time-out between products in both extremities is fixed

- 4100A module now compatible with TrueBidir & Loopback SW options
- Simultaneous project creation either on ExpertOTDR or FCOMP-PRO with Job manager
- Problem with the display of the FCOMP-PRO icon is fixed on ONA-800

OSA/OCC

Problem corrections

- Configuration table functionality is now available with WDM expert license new GUI
- In Grid Mode "Manual" the marker can jump to wrong channel if clicking WDM table line is fixed

Job Manager

Enhancements

- Possibility to handle job template files coming from StrataSync or MTA

TPA 1.0

New Function

- Integration of a full StrataSync/Mobile Tech App process with Job Manager

Inspection

New Function

- User interface refresh
- Allows probe microscope firmware updates via host instrument
- Now possible to add new inspection tip settings via a USB drive or StrataSync
- Now possible to add new test profiles via StrataSync
- End face image now saved/embedded within the saved JSON results

Previous version history

Version ID : 222950

Release date : July 21st, 2022

| Application | Version | Date |
|------------------|---------|------------|
| Boot | 10.81.1 | 2022/07/21 |
| Linux Kernel | 25.1.0 | 2022/05/31 |
| File System | 23.0.7 | 2022/07/22 |
| Instrument Setup | 22.52 | 2022/07/21 |
| Microscope | 22.52 | 2022/07/21 |
| Fiber Optics | 22.52 | 2022/07/21 |

Mainframe / Base Unit

New functionalities

- Integration of password protection at turn up. Optional license (EPASSWORDPROTECT)

Improvements

- Management of exclusivity when 2 OTDR modules housed on the same machine
- P5000i Inspection Probe Asset Management in StrataSync
- Increase number of characters in comment field (up to 99)
- Improvement of boot up process with color transition

Problem corrections

- Special characters ("-" and "_") added on German alphabetic keyboard
- Display error on upgrade screen corrected
- Files with a space in the name can now be uploaded to MTA (iOS only)
- Japanese: Application no longer crashes while saving pdf report

OTDR

New functionalities

- Predefined G654E specifications added to the list of fiber parameters (IOR, backscattered...)

Improvements

- Improved Touchscreen calibration for TRACE TABLE SLM selection
- Events table redesigned for better legibility
- Ability to hide trace in Expert OTDR addition
- New A & B cursor management
- Update launch cable" menu labelling - now Test Cable

Problem corrections

- OTDR Assistant (SmartTEST, FTTH-SLM): incorrect field in page "record information"
- No longer cut task naming shorter than 100 characters

- Launch cable management if incorrect length entered
- Problem of event detection after fiber end on short links now fixed
- Labelling of splice detection when manually set to 0.05dB always shows "Auto"
- Mini linear view correction when switching direction with an .msor file
- Correction of SmartLinkMapper refresh in OTDR tab after FiberComplete acquisition
- "Copy file/link to all" doesn't copy job id to the SLM-Enterprise menu
- OTDR Expert - Cursors remain hidden even in Analysis when set to "No"
- Trace info - correction of linear attenuation between A&B cursors
- Issues with mini linear view when many events detected

FTTH-SLM

Problem corrections

- Correction of incorrect trace recombination in multi-pulse acquisition

FiberComplete PRO

New functionalities

- FiberComplete-PRO MPO reference management
- CABLE-SLM integration and management into FCOMP-PRO

Improvements

- FCOMP-PRO now saves msor file with AB and BA multi-wavelength OTDR traces and distributed events (sor storage to be selected in Expert)
- Enable loss and ORL results display with TrueBIDIR only
- Add loss, ORL and length in summary table when performing TruBIDI only test
- High fiber count cable Workflow with FCOMP-PRO
- Launch cable management in Bi-dir IL/ORL only test configuration
- Do not allow START/Real Time OTDR when FCOMP/FCOMP PRO is active
- CABLE-SLM integration and management into FCOMP-PRO
- OTDR/FCOMP/FCOMP-PRO: Contextual help for ORL & total Loss
- OTDR loopback: change the JSON loopback extension file from ".fcpro.json" to ".bidir.json".
- New FCOMP-PRO connectivity icon.
- Add fiber number in FiberComplete PRO Loopback Summary table.
- Add section/slope selection in the SmartLink view.
- Adapt reference process graphic to MPO connector.

Problem corrections

- FCOMP-PRO: Wrong format type displayed in the file explorer.
- B to A slope values are not stored correct in the TrueBIDIR json files
- Incorrect Cable-SLM target storage folder when set up as "dir/current" different than disk

- In cable view, long labels are truncated- Now possible to scroll left and right

OSA/OCC

Problem corrections

- OCC pdf report now matches results table
- Wait period with nanoOSA (41OSA) now working
- Open OSA trace without autozoom and keep zoom defined at storage
- OCC drift function brought back

Version ID : 220740

Release date : February 17th, 2022

| Application | Version | Date |
|------------------|---------|------------|
| Boot | 10.81.0 | 2022/01/28 |
| Linux Kernel | 21.8.2 | 2021/12/17 |
| File System | 21.10.2 | 2022/02/17 |
| Instrument Setup | 22.02 | 2022/02/17 |
| Microscope | 22.02 | 2022/02/17 |
| Fiber Optics | 22.02 | 2022/02/17 |

Mainframe / Base Unit

New functionalities

- Management of the new 4100 A-Series OTDR module

Improvements

- Improved and simplified software upgrade messages and softkeys (via Ethernet/WiFi)
- Test set calibration date added to all .pdf reports
- Improved readability in the About page of modules long part number and serial number

Problem corrections

- Merge of multiple .pdf in the File Explorer

Microscope

New functionalities

- Microscope function put in live mode when coming from the job manager

LTS (Light source & power meter)

Problem corrections

- Proper management of the power meter zero offset

OTDR

New functionalities

- Fiber ID added to Fast Report setup menu

Improvements

- Key and menu labels updates:
 - **File** setup changed into **Report**
 - **File** softkey changed into **File Explorer**
- User interface updates:
 - Zoom buttons position moved to the top right corner of the graph
 - Setup menu: **Test Cables** section added. It contains Launch, Receive and Loopback cable settings
 - SmartLink Mapper: ability to select a section/slope
 - SmartLink Mapper: enhancement of the event detail description (splitter description with FTTH-SLM Base license, pass/fail criteria & threshold values)

FTTH-SLM

New functionalities

- Job ID added to .csor PDF report

Improvements

- When Job Manager pushes FTTH config file, it updates the "Config." setup field inside FTTH-SLM

Problem corrections

- When the first event corresponding to the first standard splitter (of an unbalanced splitters network) is detected at position < 0m, the event is not detected/interpreted as splitter but as launch cable.

FiberComplete PRO

New functionalities

- Fiber number increased to 9999
- Cable-SLM management to create project/cable view and simplify the management of high fiber count testing:
 - New button **Manage Project** and setup popup window: import label list, create simplex or MPO cable structure
 - Fully automated test sequence for up to 12 fibers (with integrated MPO switch)
 - Pass/fail status of tested fibers/labels in **Cable** tab
 - Creation of a .prj file that contains labels / structure and pass/fail status
 - When a Cable-SLM project closes, a summary .pdf report is generated. It contains the average loss, worst ORL, length and pass/fail status per tested labels/IDs and wavelengths.
 - Switch port used for the current measurement is displayed in the **Process** tab
- Length of the fiber under test, displayed in the **Process** tab on the **synoptic**, does not include the launch and receive cables length

Improvements

- Suppression of launch and receive cable management by event position
- Enhancement of bi-directional OTDR (Loopback mode) slope measurement
- Pass/fail event thresholds made available for the bi-directional OTDR Loopback mode
- Better management of custom jobs coming from StrataSync
- Fault Finder results only visible in the Fault Finder tab
- OTDR Loopback mode allowed when changing setup from IL/ORL and/or TrueBIDIR/BiDir OTDR

Problem corrections

- Fault Finder results only visible in the Fault Finder tab
- When using Expert OTDR settings, the file naming of the OTDR results missed the wavelength field (if OneTrace/.sor). To make sure the file name is understandable, underscores are added between the fields.
- Improved length measurement with 4100 MA3-FCOMP

OSA/OCC

Improvements

- Nano OSA: better management of the splitter compensation function

Previous version history

Version ID : 21.9.11

Release date : Dec 01, 2021

| Application | version | Date |
|------------------|---------|------------|
| Boot | 10.80 | 2021/10/08 |
| Linux Kernel | 21.8.2 | 2021/09/27 |
| File System | 21.9.11 | 2021/11/26 |
| Instrument Setup | 21.62 | 2021/11/26 |
| Microscope | 21.62 | 2021/11/26 |
| Fiber Optics | 21.62 | 2021/11/26 |

Mainframe / Base Unit

New functionalities

- Improvements and corrections of the new user interface

Improvements

- German translation errors
- PDF report now better highlights failed results

Problem corrections

- Home page text overlap in Portuguese language

OTDR

Improvements

- TrueBIDIR function can now be activated on any 4100 series B & C OTDR modules
- Management of different extremities

Problem corrections

- TrueBIDIR now works when directory name contains space

FCOMP-PRO/FiberComplete

Improvements

- TrueBIDIR function now activates on any 4100 series B & C OTDR modules
- Management of different extremities

Problem corrections

- Setup exchange now possible even if talk set or cloud connection enabled between both test sets

Previous version history

Version ID : 21.9.2

Release date : October 8th 2021

| Application | version |
|------------------|---------|
| Boot | 10.80 |
| Linux Kernel | 21.8.2 |
| File System | 21.9.2 |
| Instrument Setup | 21.50 |
| Microscope | 21.50 |
| Fiber Optics | 21.50 |

Mainframe / Base Unit

New functionalities

- Improvements and corrections of the new user interface
- Addition new license TrueBIDIR: ETRUEBIDIR-FCOMP-PRO

Improvements

- PDF reports always include cursors A&B on graph
- Ability to do a screenshot from the Results page with new UI
- Translation updates (Chinese, German, Hungarian and others)

Problem corrections

- T-BERD/MTS4000 random lock up at turn-up (White screen)

Microscope

Improvements

- Test report settings always kept at product turn off

OTDR

New functionalities

- New TRUEBIDIR functionality allowing performing automated bi-directional OTDR measurements with setup and results transfer through the fiber under test
- Add 25GHz channel grid for DWDM OTDR application

Improvements

- Better management of 3-splitter clusters in PON architecture with FTTH-SLM
- Optimized test time vs. pulsewidth in high split ratio (>1x64)

Problem corrections

- The launch cable integrated into the OTDR modules is correctly managed
- Average loss value different between pdf report and SLM Test Process Automation (TPA)

New functionalities

- Management of FiberComplete workflow into Staratsync, MobileTechApp and Job Manager

- Management of new FCOMP-PRO results and jobs (workflow process availability pending official Stratasync software version 13.0 and MobileTechApp 4.6)
- Send and receive FCOMP-PRO config files to/from Stratasync

Improvements

- Add metadata to Bidir IL/ORL pdf reports for Stratasync
- Inspection scope + OTDR process flow better managed Problem corrections
- Factory sync of purchase order number and date

OSA/OCC

New functionalities

- New OSA module for T-BERD/MTS 2000/4000/5800 and ONA-800 mainframes
- New OSA user interface

FCOMP-PRO/FiberComplete

New functionalities

- New TRUEBIDIR functionality allowing performing automated bi-directional OTDR measurements with setup and results transfer through the fiber under test
- Ability to sequence automated bi-directional IL/ORL and TrueBIDIR OTDR Improvements
- MPO switch management sequencing 12 FiberComplete measurements and auto-detecting MPO cable polarity type.
